

# CSE341 Programming Languages

## Homework 4 Report

### Part1:

Correctly implemented and works fine.

### Part2:

First predicate of `sroute` works fine but the other predicates have some problem that I can not figure out. Also, `shortest` predicate that calculates the minimum value of a list works fine.

### Part3:

Correctly implemented and works fine.

### Part4:

Correctly implemented and works fine.

### Part5:

Not implemented yet.

### Part6:

Not implemented yet.
